Vascular & Interventional Radiology

THE REQUISITES™

John A. Kaufman, MD • Michael J. Lee, MSc, FRCPI, FRCR, FFR(RCSI)

This concise, practical resource efficiently covers all of today's **need-to-know information** in vascular and interventional radiology ... in an exceptionally **user-friendly format**.

- Provides a comprehensive, yet manageable review of the principles and practice of vascular and interventional radiology.
- Includes a wealth of practice-proven tips and expert advice to help you master a full range of procedures, whether basic or advanced.
- Offers excellent problem-solving guidance, superbly illustrated by more than 1,300 multi-modality images of the highest quality.
- Covers vascular and interventional radiology procedures for the lower extremity and pelvis • abdomen • thorax • great vessel • biliary tract • genitourinary and reproductive tracts • gastrointestinal tract • and thorax.
- Delivers in-depth discussions of “hot” techniques such as 3-D imaging with MRA/CTA • newer interventions such as stent-grafts • saphenous vein ablation • extracranial carotid angio-intervention • radiofrequency ablation • and vertebroplasty.

Because it's so compact, clinically oriented, and easy to read, **Vascular and Interventional Radiology: The REQUISITES™** is an ideal study tool as well as a convenient reference for practice.

The REQUISITES™ in Radiology (James H. Thrall, MD, Series Editor) make it easy to review the core knowledge in each subspecialty. Covering everything from basic principles through cutting-edge techniques, these books help you to succeed in radiology examinations, subspecialty rotations, and clinical practice. Their convenient size, quick-access format, high-quality images, and concise text are ideally suited to the needs of today's busy residents and clinicians.

NOTICE

Radiology is an ever-changing field. Standard safety precautions must be followed, but as new research and clinical experience broaden our knowledge, changes in treatment and drug therapy may become necessary or appropriate. Readers are advised to check the most current product information provided by the manufacturer of each drug to be administered to verify the recommended dose, the method and duration of administration, and contraindications. It is the responsibility of the treating physician, relying on experience and knowledge of the patient, to determine dosages and the best treatment for each individual patient. Neither the publisher nor the authors assume any liability for any injury and/or damage to persons or property arising from this publication.
